Importance: High

Subject: UTV International Achiever RT-04 All Season Low Ground Pressure Tracked Carrier Info

The Achiever RT-04 max **fording depth is 36"**. A 1 Man Open Cab is standard, 2 Man & 4 Man Open or Closed Cabs are available. **29" All Season High Profile Rubber Tracks** are **standard** and give a ground pressure of **1.45 PSI unloaded** and 2.62 PSI loaded. 28" D-Dent tracks are available. **33" High Profile Rubber Tracks** give a ground pressure of **1.27 PSI unloaded** and **2.30 PSI loaded**. A Full Rear Deck option is also available. Also available are Rear Low Flow Hydraulics or Rear High Flow Hydraulics giving 45 GPM at 2,700 PSI while the vehicle is stationary. **Available Payload is 8,000 lbs**. Oil Bath Road Wheel Hubs are available as are optional Ice Claws for the tracks.

UTV has switched to Tier 4 engines as per EPA mandate and **DEF tanks are installed**. The Tier 4 Achiever RT-04 features a **134 HP** Deutz AG **electronic** engine which combined with the completed unit weight of approximately 11,000 lbs gives a greater power to weight ratio than any other 4 ton payload tracked carrier . The difference when climbing hills in your area will be noticeable.

The **standard** RT-04 U equipped with block heater and glow plugs will start at up to -4°F / -20°C. Addition of either a 120v oil tank heater or a programmable 12v engine coolant heater if no external power is available for the block heater will provide for engine start up to -13°F / -25°C. Adding synthetic engine & ISO 22 hydraulic oil & a winter bridge & engine cover will provide for engine start up to -22°F / -30°C. An extreme cold package for engine start & operations up to -40°F / -40°C is available as well.

All UTV supplied items are guaranteed for one full year except for consumables such as filters, etc. 75% of the components in a UTV vehicle are acquired by UTV in the USA. The Engine is guaranteed by Deutz AG for one full year from the date that you take possession of the vehicle, a second year or 2,000 hours on all engine components and a **third year or 3,000 hours** on main engine components: Crankcase, Crankshaft, Camshaft, Connecting Rods and Cylinder Head Casing
